Zips provided for **OPTIONAL EXTRA Nose Cone Patio.**

Zips provided for **OPTIONAL EXTRA Tailgate Patio.**

Zips provided for **OPTIONAL EXTRA Tail Gate Patio & Wall Sets.**

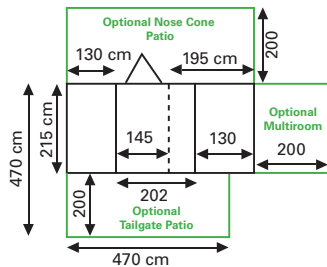

## XT CLASSIC

The **NEW XTTrailer Tent** range has a distinguishing feature of a revised flysheet. The flysheet is now completely separate from the tent roof and made from Surface Fluoro Carbon coated Ripstop canvas. Benefits of the new flysheet are immediately noticeable, enabling a larger insulating airspace above the tent roof and thus making the interior of the tent noticeably cooler.

To further enhance airflow in hot climates the XT Deluxe comes standard with a "Skyvent" type roof. This enables you to zip open the roof to allow more airflow while being fully insect screened at the same time.

In addition the fluoro carbon coating enables a much faster water run-off in wet conditions, and coupled with the ability to tension the flysheet separately, no water damming occurs.

Added features of the XT Classic and XT Deluxe are the inclusion of a separate zip-close compartment on the top of the PVC tent cover. This makes an ideal storage area.

Ideal height of trailer rack 155-160cm from the ground.

Zips provided for **OPTIONAL EXTRA Multi Room.**

### FEATURES

- **100% polyester ripstop Fluorocarbon coated.**
- **Insect protected doors and windows.**
- **Built in PVC groundsheet.**
